

Junk Robot Friend

You will need:

Old boxes, tubes,
bottle lids etc.

Sticky tape

Paint or kitchen foil

Use whatever bits and pieces of junk that you have in your house to build your new robot friend. Use sticky tape to stick the parts together. You can of course glue, but we like a quick result!

Paint your robot (or wrap the robot in kitchen foil for an even quicker result, or if you want to keep the kitchen clean!)

Stick on bottle lids as eyes and don't forget to add some buttons!

What qualities does your new special friend need to have?
