

Weaving

You will need: Cardboard, scissors, wool/thread/yarn, tape.

1. Make a simple loom using a piece of cardboard.
2. Carefully cut an even number of notches or zig-zags on either side of the cardboard (6 or 8 works well). Wrap a string/yarn/wool around the board (the warp) and tie or tape off at the ends.
3. Choose different colour string/yarn/wool to weave over and under the warp (this is the weft). You can change colours to create a pattern by tying on a new colour.
4. When you reach the end, carefully tie off and cut along the edge to remove the board to release the weaving.
